### PROFESSIONAL SUMMARY

Passionate Gameplay Programmer with professional experience developing high-performance mobile games and playable advertisements using Unity, C#, TypeScript, and Three.js. Experienced in designing scalable gameplay systems, optimization techniques, AI behaviours, UI systems, shaders, and custom editor tools.

Strong understanding of gameplay architecture, clean code practices, and performance optimization for WebGL and mobile platforms. Dedicated to creating polished player experiences while continuously learning new technologies and improving development workflows.

### WORK EXPERIENCE

#### Gameplay Programmer, Funcell Game PVT LTG

Nov 2024- Present

Developed 55+ playable advertisements for Android, iOS, and WebGL platforms, specializing in TypeScript with Three.js and C# with Unity 3D. Built high-performance, interactive experiences that combine engaging gameplay with optimized performance, enabling seamless cross-platform deployment.

#### Key Responsibilities & Achievements

- Developed and shipped 55+ playable ads across multiple genres, including hyper-casual and idle games.
- Designed and implemented core gameplay mechanics, player controllers, camera systems, AI behaviors, and UI interactions.
- Built reusable gameplay frameworks and modular systems to accelerate development across projects.
- Optimized games for WebGL and mobile platforms, improving performance, memory usage, and loading times.
- Created scalable, maintainable gameplay architecture following clean coding principles and industry best practices.
- Collaborated closely with game designers, artists, and QA teams to deliver polished, production-ready experiences.
- Identified, debugged, and resolved gameplay and performance issues to ensure stable, high-quality releases.
- Contributed to rapid prototyping, feature iteration, and gameplay balancing throughout the development lifecycle.

#### Gameplay Programmer (Internship), Funcell Game PVT LTG

Fab 2024 - Sep 2024

- Completed hands-on training in Unity, C#, TypeScript, and Three.js within a professional game development environment.
- Learned gameplay programming fundamentals, debugging techniques, version control (Git), and collaborative development workflows.
- Gained practical experience in developing and optimizing playable advertisements for WebGL and mobile platforms.

### EDUCATION

#### Bachelor of Technology, Computer Engineering

- SILVER OAK UNIVERSITY
- 2023 - 2026

#### Diploma of Education, Computer Engineering

- Ganpat University
- 2020 - 2023

### FEATURED PROJECTS

- Flop House (idle tycoon)
- Mini Ants Empire
- Drill & Collect
- Idle Farm: Farming Simulator
- Wild West Miner - Gold Rush
- Eye Color Mix

#### Highlights

Multiple Playable ads & Versions, Core gameplay logic, Visuals, economy, NPC behaviour, ASMR-style polish, created tutorial interactions, touch controls, Built progress tracking system, created reusable gameplay architecture, Fake Physics, colouring, auto colour pick from texture, queue & customer management.

**TECHNICAL SKILLS**

**LANGUAGE**

- C#
  - TypeScript
  - THREE.js
  - Unity Engine
  - Playable Ads
  - WebGL
- Mobile Game Development
  - AI & NPC Behaviors
  - Memory Optimization
  - Performance Profiling
  - Particle Systems
  - Gameplay Architecture

- English
- Hindi

---

**CAREER OBJECTIVE**

To contribute as a Gameplay Programmer in a world-class game studio while building engaging gameplay experiences, continuously improving my technical expertise, and ultimately growing IONIX Games into a globally recognized game development studio.
